

Jan Neil Mendoza

Malaking Pulo, Tanauan City, Batangas
janneil.jnm@gmail.com | 0945 581 0908

Professional Summary

Computer Engineering undergraduate with hands-on experience in software development, embedded systems, IoT projects, and microcontroller programming. Knowledgeable in Python, Java, C++, HTML, CSS, JavaScript, SQL, and MongoDB. Passionate about developing practical technology solutions and eager to contribute technical and problem-solving skills in a professional environment.

Education

Batangas State University – The National Engineering University — Alangilan, Batangas City Bachelor of Science in Computer Engineering, 2025

Professional Experience

Zvoid Philippines Inc. — Calamba, Laguna
Technical Support | August 2025 – Present

- Diagnosed and resolved hardware, software, and operating system issues for desktop and laptop computers.
- Troubleshoot and maintained network connectivity, including VLAN configuration, IP addressing, and internet-related issues.
- Installed, configured, and maintained computer systems, applications, and peripheral devices.
- Provided technical support to end users, ensuring timely resolution of IT-related concerns.
- Monitored and maintained network performance to ensure reliable connectivity and minimal downtime.
- Designed, developed, and maintained company websites to support business operations and improve user experience.
- Implemented website enhancements, performed updates, and optimized functionality based on organizational requirements.
- Collaborated with different departments to identify technical needs and develop effective IT and web-based solutions.

Technical Support Intern | February 2025 – May 2025

- Assisted the IT team in troubleshooting hardware, software, and network issues.
- Installed and configured desktop computers, laptops, printers, and other peripheral devices.
- Provided technical assistance to employees for basic IT concerns.
- Supported preventive maintenance and inventory of IT equipment.
- Assisted in website maintenance and implementation of system updates.

Technical Skills

- **Programming Languages:** Python, Java, C++
- **Web Technologies & Databases:** HTML, CSS, JavaScript, MongoDB
- **Engineering & Design:** Circuit Design, Prototyping, Debugging
- **Hardware & Embedded Systems:** Microcontrollers, Embedded Systems
- **Software & Productivity Tools:** Microsoft Office
- **Development Methodologies:** Agile, Waterfall
- **Professional Skills:** Teamwork, Time Management, Problem Solving

Projects

Automatic Mini Fan — Python-based automatic fan system activated by temperature threshold.

Simple Voting System — Desktop voting application using Java and SQL.

Food Recipe Blog — Web app using HTML, CSS, JavaScript, and MongoDB.

IoT-Based Cleaning Mop — Remote-controlled IoT cleaning mop.

Seminars & Training

- Industrial Evolution: Fusing Maintenance Mastery with Digital Prowess for the Philippine Market (Sept 2024)
- Introduction to Natural Language Processing (Oct 2024)
- Building a Smarter Grid: IoT, Security, and Innovation in the Philippines (Oct 2024)
- Synthetic Aperture Radar (SAR) in Geographical Topography (Oct 2024)
